

PER I TURISTI STRANIERI: GUIDARE IN ITALIA

CAMPER USERS

When driving a camper, you need to have with you the following documents:

- Valid national driving licence enabling to drive the category of vehicle driven.
Unless your national driving licence was issued by an EU/EFTA-member state, it must be accompanied either by an international driving permit, to be obtained prior to departure, or by a sworn translation into Italian.
- Third Party Liability insurance cover, including passengers, excluding the driver.
Theft and fire covers, as well as kasko (comprehensive) insurance, covering all risks regarding vehicle, passengers and driver, are optional.
Residents of non-EU countries should contact their insurance company prior to departure and check whether they need a green card or a short term insurance.
- Vehicle registration certificate.

All foreign-registered vehicles circulating in Italy must display a nationality sticker at the rear.

SPEED LIMITS

Speed limits for camper vans:

- 50 km/h in built-up areas; 80 km/h outside built-up areas; 100 km/h on motorways (laden weight between 3.5 and 12 t)
- 50 km/h in built-up areas; 70 km/h outside built-up areas; 80 km/h on motorways (laden weight over 12 t);

It is compulsory to adjust speed according to load and road conditions. It is also compulsory to comply with all – even temporary – speed limits on any kind of road.

PARKING AND STOPPING CAMPERS

Areas where parking or stopping is allowed are indicated by specific road signs and can be found on dedicated websites.

It is also possible to park campers in areas reserved for vehicles, displaying the payment receipt on the dashboard (if required).

PER I TURISTI STRANIERI: GUIDARE IN ITALIA

RELOADING ELECTRICITY AND WASTEWATER DISPOSAL

Electricity can be reloaded at electric hook-up points located within camp sites or at parking or stopping areas.

Wastewater must be drained into specific areas available in each town or within camp sites.

TRANSPORTABLE LOADS

Mopeds and bikes can be transported provided that the camper is equipped with the appropriate carrier. An overhanging load must not exceed 30% of the length of the vehicle and may only overhang at the rear. It must be indicated by a square panel 50cm by 50cm with reflectorised red and white diagonal stripes.

A carrier can be installed on a camper to transport dinghies, windsurfs or little boats.
