

PER I TURISTI STRANIERI: GUIDARE IN ITALIA

- **TUNNELS**

Tunnels are frequent in the Italian road and motorway network, both through the Alps and the Apennines ranges. Major Alpine tunnels are subject to tolling.

Behaviour rules when driving in a tunnel:

- Respect the speed limits
- Keep a safe distance from the preceding vehicle
- Never make a U-turn and never drive in reverse gear
- Memorize the location of emergency exits and S.O.S. posts
- In case of fire, try to extinguish the fire only if this is at the initial stage. Otherwise, leave your vehicle behind and go off immediately, leaving the tunnel in the direction opposite to the fire spread.
