

PER I TURISTI STRANIERI: GUIDARE IN ITALIA

CAMPERVAN USERS

When driving a campervan, you need to have with you the following documents:

- ✓ Valid [national driving licence](#) enabling to drive the category of the vehicle being driven. Unless your national driving licence has been issued by an EU/EFTA-member state, it must be accompanied either by [an international driving permit](#), (also called international driving licence) to be obtained prior to departure, or by a [certified translation](#) (*traduzione giurata*) into Italian.
- ✓ Third Party Liability insurance cover, including passengers, excluding the driver. Theft and fire covers, as well as kasko (comprehensive) insurance, covering all risks regarding vehicle, passengers and driver, are optional. Therefore, for campervans it is possible, but not mandatory, to have additional guarantees, not provided for passenger cars.
- ✓ Vehicle registration certificate.
- ✓ Residents of non-EU countries should contact their insurance company prior to departure and check whether they need a [green card](#) or a [short term insurance](#).

All non-EU-registered vehicles circulating in Italy must display a nationality sticker at the rear.

SPEED LIMITS

Speed limits for campervans:

- 50 km/h in built-up areas; 80 km/h outside built-up areas; 100 km/h on motorways (laden weight between 3.5 and 12 t)
- 50 km/h in built-up areas; 70 km/h outside built-up areas; 80 km/h on motorways (laden weight over 12 t);

It is compulsory to adjust speed according to load and road conditions as well as complying with all – even temporary – speed limits on any kind of road.

On highways with three or more lanes, campervans longer than 7 m can drive only on the two rightmost lanes.

PARKING AND STOPPING CAMPERVANS

Areas where parking or stopping is allowed are indicated by specific road signs and can be found on dedicated websites.

PER I TURISTI STRANIERI: GUIDARE IN ITALIA

It is also possible to park campervans in areas reserved for vehicles, displaying the payment receipt on the dashboard (if required).

RELOADING ELECTRICITY AND WASTEWATER DISPOSAL

Electricity can be reloaded at electric hook-up points located within camp sites or at parking or stopping areas.

Wastewater must be drained into specific areas available in each town or within camp sites.

TRANSPORTABLE LOADS

Mopeds and bikes can be transported provided that the camper is equipped with the appropriate carrier. An overhanging load must not exceed 30% of the length of the vehicle and may only overhang at the rear. It must be indicated by a square panel 50cm by 50cm with reflective red and white diagonal stripes.

A carrier can be installed on a campervan to transport dinghies, windsurfs or little boats.
