VETTURA ESTATE													

(*) Per omologazione tecnica di uno pneumatico si intende che esso è stato approvato dal costruttore del veicolo per l'equipaggiamento d'origine di un suo determinato modello.

Questa approvazione viene concessa dopo test approfonditi ed un processo di approvazione che assicurano, per quel veicolo, il raggiungimento delle prestazioni ottimali.

TI

Normal

NOTA BENE: In tutti i casi, si raccomanda di verificare le misure riportate sulla carta di circolazione del veicolo.

(a) = in allestimento
 (e) = ad esaurimento
 ZP = Zero pressure
 ° = con marcatura M+S
 Reinf. = Rinforzato

XL = Extra Load = Rinforzato
 C = Cordolo di protezione
 Nd = Informazione non disponibile alla data di pubblicazione.
 Nr = Informazione non rilevata.

(*) Per omologazione tecnica di uno pneumatico si intende che esso è stato approvato dal costruttore del veicolo per l'equipaggiamento d'origine di un suo determinato modello.

Questa approvazione viene concessa dopo test approfonditi ed un processo di approvazione che assicurano, per quel veicolo, il raggiungimento delle prestazioni ottimali.

Il montaggio all'origine da parte del costruttore può contribuire ad accrescere, presso i rivenditori di pneumatici e presso gli utenti finali, la fiducia nelle prestazioni del prodotto, in quanto rappresenta una sorta di sigillo di approvazione da parte di alcuni dei nostri clienti più esigenti.

Normalmente dopo tale approvazione segue un'effettiva fornitura di pneumatici in primo equipaggiamento, comunque questo dipende dalla negoziazione commerciale tra il fabbricante dello pneumatico e del veicolo.

NOTA BENE: In tutti i casi, si raccomanda di verificare le misure riportate sulla carta di circolazione del veicolo.
