## **DRIVING IN ITALY: INFORMATION FOR VISITING MOTORISTS**

### **PARKING/GARAGING LPG-FUELLED VEHICLES**

Motorists can park LPG-fuelled vehicles conforming to the UN/ECE 67/01 Regulation - that is, all vehicles with an LPG system installed after 1st January 2001 - in the above-ground floors and first underground floor of garages, even if there are other floors below.

### **Embarking LPG/methane-fuelled vehicles on ships**

LPG/methane-fuelled vehicles can be embarked on ships, provided their fuel type has been notified at the time of booking and embarking in order to be placed in the appropriate areas. At the time of embarkation their tank must be half-empty.

These rules are not set out by law, but by the regulations of shipping companies.
